

Jameson Walter

Boulder, CO | jamesonw.com

PROFESSIONAL EXPERIENCE

Software Engineer | *SpaceNav*, Boulder, CO

Jun 2024 – Present

- Built and maintained features across a React/TypeScript web application serving as the primary interface for customers and internal teams.
- Developed and extended a Rust API responsible for managing core data operations across the SpaceNav platform, improving performance, creating new features, and connecting legacy systems to newer systems.
- Designed and deployed AWS infrastructure including Lambda-based microservices, EC2 container workloads, Step Functions state machines, and data processing pipelines.
- Maintained and supported legacy GCP infrastructure as part of the on-call operations team, handling incidents and ensuring service reliability.
- Drove adoption of Claude Code as a core part of the engineering workflow, streamlining development across frontend, backend, and infrastructure work.
- Worked across the full stack and multiple service boundaries, contributing to frontend, backend, infrastructure, and operational tooling.

Software Engineering Intern | *bean Tech Solutions*, Fort Collins, CO

May 2022 – Aug 2022

- Developed full-stack web applications using JavaScript and Java with backend integration in a team environment using Agile and GitHub.
- Applied clean code practices to improve readability and long-term maintainability of shared codebases.

PROJECTS

Portfolio | *React, AWS, HTML, CSS*

May 2022 – Present

- jamesonw.com – Personal portfolio built with React and deployed on AWS, showcasing projects and skills.

healthtrkr | *React, Express, PostgreSQL, Prisma, Docker*

2025 – Present

- Built a full-stack health and fitness tracker featuring calorie/protein logging and weekly progress charts.
- Designed a PostgreSQL database with Prisma ORM, implemented JWT authentication, and integrated the USDA food database for nutritional search.

Chess Game | *React, TypeScript, Java, SQL, UNIX*

Aug 2023 – Dec 2023

- Built an asynchronous multiplayer chess game using Agile, managing two SQL databases for user accounts and game state.

Trip Itinerary Planner | *React, Java, SQL, Docker*

Aug 2022 – Dec 2022

- Developed a full-stack trip planning application in a Scrum team of 3, featuring a search engine backed by SQL and optimization algorithms in Java.

EDUCATION

Bachelor of Science in Computer Science | Software Engineering Concentration

May 2024

Colorado State University | GPA: 3.3/4.0

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Rust, Java, Python, C++, C, HTML, CSS, C#, PHP, Assembly

Frameworks & Libraries: React, Express, Node.js, Prisma, Tailwind CSS

Cloud & Infrastructure: AWS (Lambda, EC2, Step Functions, S3), GCP, Docker, GitHub Actions

Databases & Tools: PostgreSQL, SQL, MongoDB, Prisma, Git, GitHub, Claude Code
